Comparative Analysis of the Government of Moldova and Georgia's Management of the Education sector. The Magic wand or the Achilles heel?

Abstract

Your abstract should contain at least your research topic, research questions, participants, methods, results, data analysis, and conclusions. You may also include possible implications of your research and future work you see connected with your findings. Your abstract should be a single paragraph double-spaced. Your abstract should be between 150 and 250 words.

Introduction

In the introduction you should state the problem or objective of your research paper (why did you study? Why it is worth studying? Does the proposed study have practical significance?); formulate the research question(s) and briefly discuss the structure of your paper, I,e, what follows in the section two, three etc.

1. Literature review

In this section do critical review of the quant articles/papers that are relevant to your research topic/question. This review should include the research question asked by the authors; theories used; research hypothesis stated; significance of the study; data, sources, variables etc.; statistical tools used in the analysis; findings and implications of the papers of your study – theory, data and statistical techniques.

In-text references must be included following the use of a quote or paraphrase taken from another piece of work.

In-text citations are citations within the main body of the text and refer to a direct quote or paraphrase. They correspond to a reference in the main reference list. These citations include the surname of the author and date of publication only, for ex: Mitchell (2017) states… Or …(Mitchell, 2017).

The structure of this changes depending on whether a direct quote or parenthetical used:

Direct Quote: The citation must follow the quote directly and contain a page number after the date, for example (Mitchell, 2017, p.104). This rule holds for all of the variations listed.

For parenthetical citation, the page number is not needed. (Crudu, Sirbu & Ignatov, 2017).

2. Data and Methodology

Describe what indicators you wil be used to measure the variables of your model, what is the source of your data and what methods of research you will be using in your paper.

3. The Model and Findings

In this section describe the model you are going to use and the hypotheses that you are formally testing. Ehat is your dependent and independent variables? Do the descriptive analysis of your dependent and independent variables.
